New Product Announcement - MicroShield™

April 2010

## Maiman Launches MicroShield™ Antimicrobial Thermal Fused Doors

The Maiman Company is pleased to announce MicroShield™ antimicrobial Thermal Fused Doors with all decorative Coveright® Silverright faces. This antimicrobial technology is a silver-based, thermally fused resin that permanently suppresses the growth of organisms such as bacteria, algae, fungus, mold and mildew.

- Suppresses microbes
- Can't rub off even with harsh chemical cleaners
- Non-toxic
- Available on over [100 Coveright faces](#)
- Lasts for the life of the door

Maiman's MicroShield Thermal Fused Door is the right solution for healthcare and educational facilities because it provides additional protection and prevention against harmful bacteria, meeting the highest standard in hygiene.

For any technical questions, please contact David San Paolo at 417-616-8272 or [davidsp@maiman.com](mailto:davidsp@maiman.com).

For quote requests, please contact your local Maiman customer service representative.
