YALE® inTouch™: The Industry's First Touchscreen Lockset

Lenoir City, TN – Cell phone chic meets locking hardware brawn in the new inTouch™ lockset from YALE. inTouch combines a touchscreen display with a cylindrical lockset to redesign the industry's concept of stand-alone locking devices.

The most striking contrast between inTouch and other stand-alone key pad devices are the buttons—there are no buttons. Instead, inTouch features a digital display that awakens when touched. Programming and day-to-day use of the lock is simplified with an interactive, voice-guided system.

Access is granted with entry of 4-12-digit user pin codes. A request to exit (REX) input allows remote access capability. Two operational modes are available: EZ Mode that accommodates up to nine unique user identities and Advanced Mode that accommodates up to 1,000 unique user identities. Additional capabilities include a lockout mode, passage mode and auto re-lock.

Yale Commercial Locks and Hardware
100 Yale Avenue • Lenoir City, TN 37771-3226 USA
Tel (865) 986-7511 • Fax (865) 986-8630 • www.yalecommercial.com

inTouch is ideal for healthcare facilities, offices, retail establishments, government facilities, or any application that requires stand-alone access control. The lockset is powered by 4 AA batteries. Installation is quick and easy, requiring only 5 screws.
