Press Release

SARGENT® WiFi-enabled locksets and AMT software now compatible

New Haven – SARGENT, an ASSA ABLOY Group company, announces that its Profile Series v.S2 WiFi-enabled lockset now integrates with the WebBrix 3.0 access control software from Automated Management Technologies, Inc. (AMT).

The Integration allows users of WebBrix 3.0 to build access control systems that can seamlessly incorporate the wireless locksets from SARGENT.

“We are excited to partner with AMT and offer end-users a locking solution that fits into their access control platform,” said Martin Huddart, Vice President - Electronic Access Control for ASSA ABLOY Door Security Solutions. “Partners like AMT enable ASSA ABLOY to develop open architecture locking solutions that expand facility access control.”

“AMT’s integration with the SARGENT v.S2 has allowed it to address special requirements found in hosted environments,” said Gary Larson, President of AMT. “WebBrix 3.0’s support for installer friendly products like the SARGENT Profile Series v.S2 dramatically lowers cost of install for end-user systems.”

The appeal of the v.S2 lock is in the ease of installation resulting in a reduction of labor and costs. The v.S2 allows a complete proximity card reading system that can be installed without any wiring or re-work of door frames.

The open-standard 802.11 b/g WiFi infrastructure in the v.S2 product allows it to communicate through an existing Wi-Fi network.

WebBrix is an ASP.NET reference application used to aid in the creation of branded access control solutions. Full release of WebBrix 3.0 will be announced at ASIS 2009 in Anaheim, CA. WebBrix 3.0 and the SARGENT v.S2 lock will be demonstrated in the HID's booth #2919.

About SARGENT

Founded in the early 1800s, SARGENT is a market leader in locksets, cylinders, door closers, exit devices, electromechanical products and access control systems for new construction, renovations and replacement applications. The company's customer base includes commercial construction, institutional and industrial markets. For more information visit www.sargentlock.com.

About ASSA ABLOY

ASSA ABLOY is the global leader in door opening solutions, dedicated to satisfying end-user demands for security, safety and convenience.

About AMT, Inc.

AMT is a total security solutions provider that offers ready to use software, proven hardware, and complete system support. Recognizing the needs of the security industry are always growing and changing, AMT empowers their customers to customize their applications by providing source code and developer resources. They offer software engineering services, training resources and technical staff that can act as an extension of their customer's team. More information is available at www.amt-us.com
