

ML2000 Series

ML2000 Thumbturn Indicator

Corbin Russwin Introduces a Thumbturn Indicator for use with ML2000 Mortise Lock

Corbin Russwin is pleased to announce the availability of a thumbturn indicator designed for use with the ANSI/BHMA Grade 1 ML2000 mortise lock. The thumbturn indicator is located on the inside of the door and confirms whether the door is secure or unsecure. Available as sectional trim, the thumbturn is built into the occupancy indicator.

Features:

- For use with ANSI/BHMA Grade 1 ML2000 lockbody with sectional trim
- Thumbturn indicator located on the inside of the door and reads secure/unsecure
- Available in select ML2000 functions – see chart below
- Torx® pin security fasteners (standard with cylinder indicators)
