

Corbin Russwin is Pleased to Introduce the Piet Lever Collection

Corbin Russwin is pleased to introduce a new lever family to the decorative Muséo® Collection. The new Piet Collection has six aesthetically pleasing lever styles with sleek, clean lines. Designed for use with a full complement of Corbin Russwin commercial door hardware, the Piet Collection levers coordinate seamlessly with exit devices, tubular locks, mortise locks and access control hardware.

Some of the Piet levers are available with textural inserts, including leather, wood, metal and Santoprene™. The ordering string for these levers is different than the other Muséo levers. See the charts below and on the next page for the available lever trim and finish options and how to order the Piet levers.
