

CL3900 Series

Removal from Quick Ship Programs
& Approved Product Tab in Comsense SpecWriter

CL3800 REPLACES CL3900 Quick Ship Programs & Specifications

The **CL3800** was specifically designed to complement the CL3300 Series Extra Heavy-Duty Grade 1 and the CL3500 Series Heavy-Duty Grade 1 Cylindrical Lever Lockset designs, providing distributors with an economical, lower priced Grade 2, lever lockset. The CL3800 is ideal for standard-duty commercial and residential multi-family use, featuring free wheeling, anti-vandal lever trim when locked.

Beginning October - 2007, the CL3800 is to be specified in place of the CL3900 Series which is being removed from the approved products tab in our specification writing tools (Comsense SpecWriter) and all Corbin Russwin quick ship programs. The CL3900 will be available for replacement orders only. Pricing for the CL3800 is equivalent to the CL3900

FAQ'S

Is the CL3900 discontinued?

No. Corbin Russwin will offer the CL3900 series for replacement orders only and continue providing technical product support. However, all Quick-Ship item numbers for both warehouses will be discontinued. The CL3800 has an identical quick ship program to the CL3900.

What is the price difference?

None. The CL3800 is priced to match the CL3900 including quick ship programs, buying programs and standard product configurations x miscellaneous options.

Will customer service automatically convert CL3900 orders to the CL3800?

Yes. Effective October 1, 2007, customer service will contact each customer to verify the change. At months end, customer service will automatically convert all orders for the CL3900 over to the CL3800, unless specifically for replacement orders. Notification of such changes will be reported on order acknowledgement.

What about replacement orders?

Corbin Russwin will accept and manufacture products for replacement orders or facility expansions with an installed base of CL3900 locksets.

Quick Ship Numbers?
