Sustainability can be complex, ASSA ABLOY makes it easy.

Designing and constructing today’s sustainable buildings means taking into account their overall impact on human health and the environment. Third-party certification standards have increased the awareness around the impact of the built environment, resulting in a need for rethought, modern solutions.

Enter ASSA ABLOY, a manufacturer whose commitment to sustainability is unmatched in the door and hardware industry. From material ingredient reporting to improving energy efficiency to manufacturing process transparency, our consultative experts can help you navigate the complexities of today’s requirements to reach your sustainability goals.

Transparency

Manufacturers must be able to disclose where a product was made, how it was made, and what is in it. ASSA ABLOY is at the forefront of providing transparency documentation in support of LEED, Living Building Challenge, and WELL- including Health Product Declarations (HPDs), Environmental Product Declarations (EPDs), and Declare labels.

**Transparency of Suppliers**
Making sure that those in the ASSA ABLOY supply chain follow strict guidelines for sustainable and ethical best practices.

**Transparency in Operations**
Making sure that those in the ASSA ABLOY supply chain follow strict guidelines for sustainable and ethical best practices.

**Transparency in Product Ingredients**
Guaranteeing that your door opening products come from ingredients in ASSA ABLOY products support health and wellness of building inhabitants.

Saint-Gobain and CertainTeed’s state of the art headquarters in Pennsylvania has earned LEED 2009 Platinum certification by utilizing sustainable products. ASSA ABLOY collaborated with Saint-Gobain to provide six distinct door opening solutions, each of which has obtained an Environmental Product Declaration (EPD).
Energy Efficiency

Project teams and building owners are getting more creative about energy reduction and cost savings. The exterior building envelope and electrified products can contribute in a positive way. Exterior envelope products are designed and tested together to provide barriers of thermal transmittance. Electrified products apply hybrid technologies or utilize existing infrastructure to lessen power draw at each opening.

Electrified Products
- IP-Enabled WiFi Access Control
- PoE IP-Enabled Access Control
- EcoFlex® Mortise Lock
- EcoPower™ Power Supply
- EcoMag™ Magnalock
- EcoFlex® Exit Trim

Exterior Envelope Solutions
- Mercury Door & Frame System
- Thermal Break Frames
- Gasketing (Weatherstripping)
- Door Closers & Operators

Industry Alignment

ASSA ABLOY is at the forefront of innovation globally – serving as a contributing member to many organizations worldwide who seek to improve the sustainability features of the built environment.

- U. S. Green Building Council
- Canada Green Building Council
- International Living Future Institute
- Health Product Declaration Collaborative
- Global Reporting Initiative

Resources

Products and solutions from ASSA ABLOY can help to contribute to sustainable building projects, in more ways than ever before. To see how, use these resources – and collaborate with an ASSA ABLOY consultative expert.
